

BEFORE

Twin Towers is a 1950's era development in the Hyde Park neighborhood that consists of two 22 story residential apartment buildings connected by a 1 story entrance lobby. Hirsch Associates redesigned the laundry rooms within each Tower with new finishes, lighting and equipment. Also included were new public washrooms, flat panel television monitors and vending machine alcoves.

AFTER

BEFORE

A vacant storage space adjacent to the west laundry room was redesigned as a Business Center to provide residents with computers, a printer and wireless internet for laptop computers, plus lounge type seating. Hirsch Associates provided the supporting architectural design for the engineering effort to completely replace the building's mechanical systems with the addition of central air conditioning.
